

IBM Research Internships

Work with IBM researchers on real projects in areas of current research

IBM offers internships at **IBM Research locations in Yorktown Heights, New York | Almaden, California | Rüschlikon, Switzerland | Tokyo, Japan**. Interns are assigned an IBM mentor with whom they work during the course of their stay.

Level required	Undergraduate through PhD (<i>ETH students only</i>)
Field of competence	Physics, Materials Science, Chemistry, Engineering
Period of internship	Typically May-August, generally 10-12 weeks
Salary	Internships are paid, salary competitive to other major companies in the IT business. Flight needs to be covered by the participant
Accommodation	Housing or housing stipend is provided

IBM will conduct the competitive application process with an international pool of candidates.
